Vice-Chair

Peter Corroon

Lynn Crane

Kelvyn H. Cullimore

Randy Horiuchi

Tom Pollard

Darrell Smith

Roy Tingey

Russ Wall

Attention Owners, Developers & Builders,

An independent fire flow analysis is required for all new commercial or residential subdivisions, new commercial buildings and residential homes that exceed 6,200sqft. Contact one of the companies below and request a fire flow analysis. Advise the company performing this test that this test must be scheduled with the Herriman City Municipal Water Department, (801) 446-5323.

### Approved Companies:

Protection Consultants Inc. (PCI)  
(801) 596-1601

VanBoerum & Frank  
(801) 530-3148

Craig Blue (801) 886-3473

Assessment of adequate fire flow is part of the fire department plan review. The fire department needs to know what the available fire flow is for your project. Please submit (2) copies of the test results with your plan review submittal. Final fire department approval will not be given on subdivisions or the release of building permits until this information has been received and reviewed.

Respectfully,

Dan DeVoogd  
Fire Inspector  
801-824-3719
